Summary

I'm a career switcher with a passion for data analytics. Recently completed the theoretical part of the Data Analyst Course at GoIT, where I gained hands-on experience with SQL, Tableau, Python (Pandas), Amplitude, and Looker Studio. With a background in leadership and decision-making, I'm now excited to grow in a new role and contribute as part of a data-driven team.

Technical Skills

- SQL – joins, CTEs, aggregation
- Python – Pandas, Jupyter Notebook
- Tableau – dashboards, interactive visuals, visual storytelling
- Google Looker Studio & Google Sheets – data visualization & reporting
- Amplitude – event segmentation, funnels, cohorts, dashboards
- BigQuery – data warehousing and advanced querying
- A/B testing & hypothesis validation
- Data cleaning, transformation & analysis
- Analytical thinking & data storytelling

Soft Skills

- Decision-making and problem-solving
- Strategic thinking and ownership
- Clear and effective communication
- Responsibility and time management
- Adaptability and client orientation

Projects

All my data analytics projects are available on GitHub:
